

NEFMLS's support for IE6 is coming to an end

IE6 is eight years old and is too limited in its support for web standards that it is impractical, if not impossible, to develop web applications that take advantage of the power of modern browsers. Accordingly, we are left with only two choices.

1. Either not taking advantage of the capability of modern browsers.
2. Or developing them and limiting support for IE6.

Since Microsoft will no longer support **IE6**, ***we choose the latter.***

As always, our support staff will continue to listen to your concerns no matter which browser you are using, but the time has come for support for **IE6** users to no longer be an option.
